0155 Petsayan St. Noveleta, Cavite | njdiscalsote25@gmail.com | 09765267317

EXPERIENCE

System Analyst Programmer, New San Jose Builders Inc.

Jul 2025 - Present

- Architected and delivered enterprise-grade applications from end to end, managing the full development lifecycle from system design to deployment, resulting in reliable, scalable business platforms.
- Designed and implemented secure, high-performance backend systems and data structures, ensuring efficient data flow, system stability, and seamless integration across multiple enterprise applications.
- Led and contributed to the development of core enterprise solutions and innovations, including Ticketing, Procurement, ESS, HRMS, and ERP systems, as well as supporting AI-driven mobile application features to improve operational efficiency and user experience.

Package App Development Analyst, Accenture

Jul 2023 - Feb 2025

- Resolved critical enterprise system issues as a level-3 escalation point, conducting in-depth investigations and root cause analysis to deliver permanent fixes and ensure system stability and minimal business disruption.
- Enhanced and maintained core business applications and automated workflows, improving operational efficiency, reducing manual processes, and ensuring consistent system performance across enterprise environments.
- Delivered data-driven insights and collaborated within Agile teams, producing actionable reports and contributing to iterative development cycles that improved decision-making and overall delivery effectiveness.

Multi-Platform Programmer, Federal Land Inc.

Oct 2021 - Jul 2023

- Provided high-priority technical support across enterprise systems, rapidly diagnosing and resolving critical issues to minimize downtime and ensure continuous business operations.
- Maintained and enhanced core business applications and workflows, addressing system defects, improving stability, and optimizing end-to-end process performance for better user experience.
- Investigated data and integration issues to ensure accuracy and reliability, producing ad-hoc reports and refining system logic to improve data consistency and operational efficiency.

Junior Software Developer, New San Jose Builders Inc.

Sep 2020 - Oct 2021

- Designed and developed scalable enterprise applications using a structured multi-layer architecture, ensuring maintainability, performance, and long-term system stability across business-critical platforms.
- Led end-to-end delivery of core enterprise systems, including HRIS and performance management solutions, streamlining organizational processes and improving workforce tracking and evaluation efficiency.
- Provided continuous post-deployment support and system enhancement, resolving production issues, optimizing system performance, and implementing new features to meet evolving business requirements.

DATA ENCODER, Quess Cor Ph

Oct 2019 - Mar 2020

- Completed intensive technical training and rapidly adapted to enterprise development practices, building strong foundational skills in application design, object-oriented principles, and database systems to support production-level work.
- Contributed to the end-to-end development of a functional reservation system prototype, participating in system design, database structuring, implementation, and testing to deliver a working solution from concept to completion.
- Presented and demonstrated the completed system to stakeholders, effectively validating technical execution and business logic through live demonstration and formal project defense.

EDUCATION

Bachelor of Science in Information Technology

2015 - 2018

ICCT Colleges Foundation Inc. | Sumulong Campus

CERTIFICATE

- Dynamics D365 Fundamentals (CRM)

TECHNICAL SKILLS

- | | |
|------------------|---|
| • HTML, CSS & JS | • ASP.NET Core Blazor |
| • Bootstrap 5 | • ASP.NET Core MVC |
| • MudBlazor | • ASP.NET Web API |
| • C#, VB.Net | • ASP.NET Entity Framework |
| • MSSQL / Oracle | • Dynamics 365 (PowerApps, Power Automate, F&O) |
| • Rest Api, LINQ | • Azure DevOps |
